

## How to Play iTunes Music on HTC Desire C

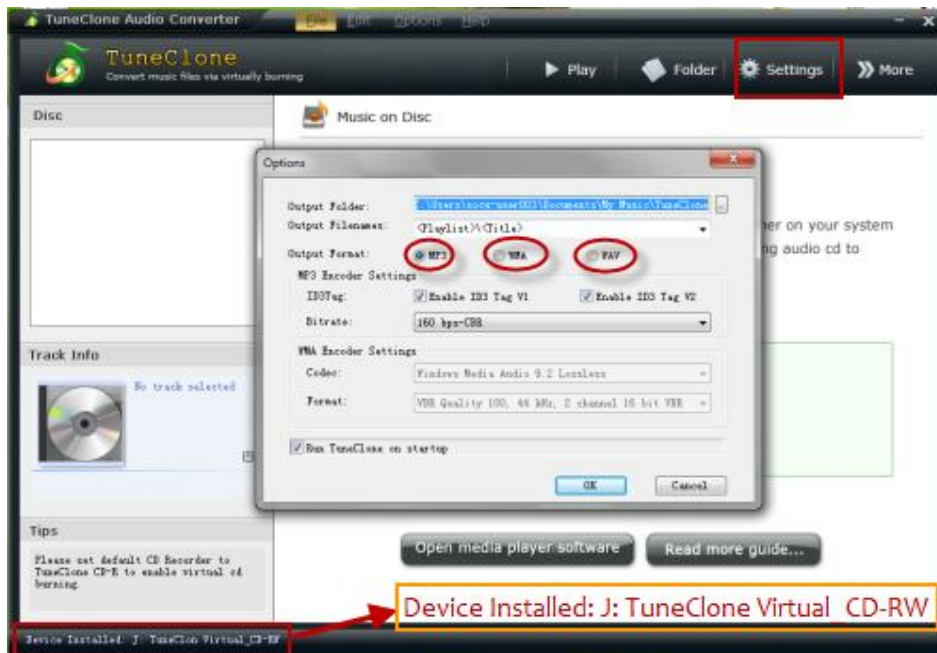

HTC has released a new entry level smartphone with a 3.5-inch HVGA display, 4GB of onboard storage, 5-megapixel camera, 600MHz CPU, 512MB of RAM and NFC. HTC Desire C (codenamed Golf) makes it easy to connect and plug into fun. Call or message and note how HTC Sense minimizes navigation for simplicity. Quick social upload means going from picture capture to share effortlessly. Continue the fun with rich, authentic sounds brought to you by Beats Audio. Have you tried to play iTunes music on HTC Desire C? Now, it is very convenient to remove the DRM copy protection of iTunes music with **TuneClone M4P to MP3 Audio Converter**. Then you can transfer it to HTC Desire C. This article will show you how to transfer iTunes music to HTC Desire C in details.

(TuneClone M4P to MP3 Audio Converter: <http://m4ptomp3.tuneclone.com/>.)

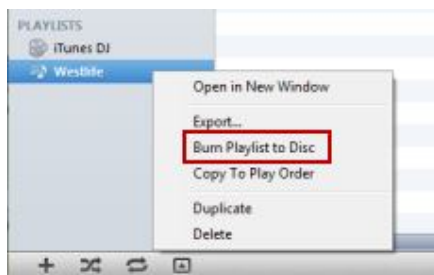

**Step1.** Create a new playlist in iTunes and add the music resource to the newly created playlist.

**Step2.** Install and run the audio converter. Click the "Settings" icon. In the pop-up dialogue, you can specify output folder, output file name, output format, etc.

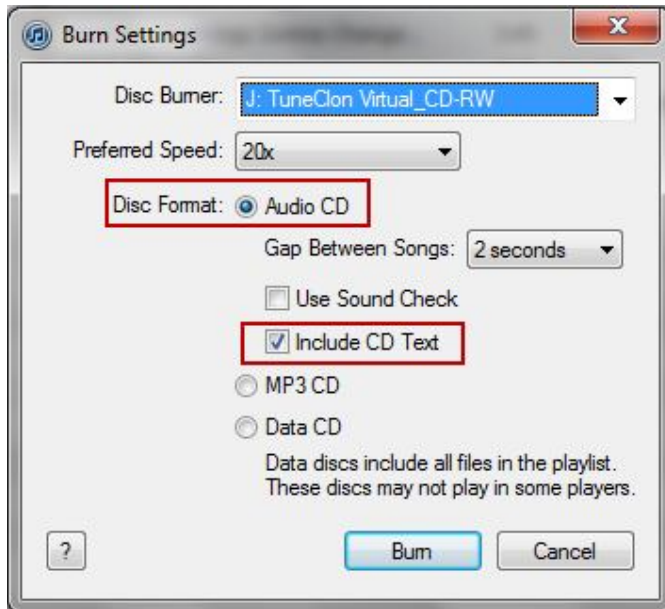

**Tips:** You can check whether TuneClone virtual CD drive is successfully installed and where it is installed at the bottom left corner of the interface.

**Step3.** In iTunes, Right click the playlist you just created and choose "Burn Playlist to Disc".

**Step4.** In the pop-up "Burn Settings", choose "TuneClon Virtual\_CD-RW" from the "Disc Burner" drop-down list, tick "Audio CD" and "Include CD Text" option. Then click "Burn" to start burning.

**Step5.** During the burning and encoding process, you can open the TuneClone manager screen to check the promotion. To locate the output folder, just click the "Folder" tab on the interface.

When you get the output music files, connect HTC Desire C to computer via the USB cable, drag and drop the converted music to the music folder, then you can play the iTunes M4P music on HTC Desire C.
